

# DEW Technologies

## Products and Services

Manage your corporate documents efficiently and provide easy and simple access to all users. At Dew Technologies we provide all the components necessary for you to achieve this.

**Capture.** Dew Technologies offer a range of scanners to handle a wide variety of document types. From small receipts to large engineering drawings, we have the right equipment to cater for your needs. We supply scanners from companies like:

Alternatively, we can arrange for documents to be captured using our **bureau service**. Save on capital costs and the management of document conversion. We provide a high quality, responsive and affordable service. Let us manage this tedious and repetitive task of scanning and indexing your documents.

**Store.** Our imaging systems are designed to take advantage of new developments in storage technology. We offer CD-ROM storage as a media that is both cost effective and widely accepted. Other storage media can be provided to meet your needs. Scanned documents can be provided in a wide range of file formats including TIFF, JPEG, PDF and BMP.

**Manage & Share.** The key to an effective document management system is simple and flexible software. Towards this end, Dew Technologies offers a range of software solutions that can be customised for your organisation. Our range includes:

- **Free CD retrieval software** (CD-Vue) with our scanning service. This is an ideal entry-level software for simple store and retrieve applications.
- **C-Library Document Management System.** Utilise the latest in web-based technology. This simple but powerful document storage and retrieval system allow authorised users to access and view documents through a simple web browser (eg. Internet Explorer). We can provide access within your company's computer network (intranet) or enable users to access the documents virtually anywhere over the internet. Our rental program provides a simple and cost-effective method of implementing this solution without the need for capital expenditure.

**Service and Support.** We provide a comprehensive range of supporting services for our clients. From project management, software customisation, system implementation, user training and on-going support, our experienced staff is always ready to provide you with the service to ensure our solution works for you.

**Easy,  
Innovative  
and  
Affordable**
